

# Step-by-Step Instructions

(PRINT this set of instructions to follow every time you refill your cartridge)

## Hewlett Packard #60 Black Pigment

**Items needed: gloves pigmented black ink, drill, #5 refill station, paper towels, review hints & tips and check list. Do not plug fill holes.**

**Syringe: Attach needle tip (located inside station # 4) to the syringe tightly. Unscrew lid on ink bottle. Puncture silver seal with needle tip making a small hole in the center of seal. Using the correct color pull the correct amount of ink into the syringe. Rinse syringe and needle tip after every use and before using syringe with another color. Rinse syringe and needle tip with water until the water runs clear.**

1. Place cartridge in Station #5 with copper circuits facing to the left and the plastic feet inside the bottom of the station to your right. Refill station lid has three holes. Place the lid on cartridge with single hole on the left and double holes on the right. Make sure lid snaps down over top of cartridge.
2. Insert the drill into the single hole on the left side of the lid. Make sure the drill goes thru the lid and deep into the inkjet cartridge below. Remove the lid from cartridge. Leave cartridge in refill station.
3. S-l-o-w-l-y release thru the syringe 10ml. of black ink or 20 ml for the #60XL.
4. Very S-L-O-W-L-Y inject ink into any hole (they all go to the same sponge, HP just used the same color mold for the black ink cartridges).
5. When finished, replace the top label or leave it off (it will make no difference in the printing).

6. To test black printing, replace the cartridge and run 1 - 3 cleaning cycles as per printer instructions. Or Print 2 pages using:

[http://www.refills4you.com/support/black\\_print\\_test.html](http://www.refills4you.com/support/black_print_test.html)    black ink test  
[http://www.refills4you.com/support/color\\_print\\_test.html](http://www.refills4you.com/support/color_print_test.html)    color ink test

**For best results, let cartridge sit for 8 hours after refilling so the ink can saturate the entire sponge.**
